DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means", "comprises" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The disclosure is objected to because of the following informalities: in paragraph [14], line 9, "FIG. 6" appears to be - - FIG. 5 - -.

Appropriate correction is required.

Drawings

3. Figure s 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, 4 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen (5,940,994). Allen '994 discloses an athletic shoe, comprising: an upper (11); a sole coupled to the upper; the sole comprising: a carbon portion (lower stabilizing plate 20 and flexible upper spring plate 24, see column 4, lines 5-11); and a titanium portion (plates 30 and 32 with at least one hole therein, see column 4, lines 31-33) coupled to the carbon portion. See Figure 2 embodiment.

6. Claims 1-5, 7-8, 11-12 and 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Lussier et al. (US Pub. No. 2002/0062578). Lussier discloses an athletic shoe, comprising: an upper (3); a sole coupled to the upper; the sole comprising: a carbon portion (forefoot plate 4, see paragraph [0027] and stability element 14, see paragraph [0038]); and a titanium portion (cleats 16, paragraph [0028]) coupled to the carbon portion. See Figure 4 embodiment.

With respect to claims 4 and 5, see paragraph [0029].

Allowable Subject Matter

7. Claims 19-24 are allowed.

Art Unit: 3728

8. Claims 6, 9-10, 13-14 and 17-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown is footwear analogous to applicant's instant invention.
